

Setup of Public Captive Portal

1. Portal basic Settings

Configure Certificate and enable HTTPS

```
config user setting
  set auth-cert "certificate"
  set auth-secure-http enable
end
```

Set public FQDN / DNS Name

```
config firewall auth-portal
  set portal-addr "portal.company.com"
end
```

2. Configure public Port

It is recommended to explicitly set a public Port

```
config system global
  set auth-https-port 45443
end
```

3. Update Policies

Simply add your Users/Groups to the Policies.
