

Bypass MS Account on Windows 11 Setup

The current Solution with `oobe\bypassnro` is not working anymore with the latest Windows 11 ISO Images.

Instead of this Command, use this `start ms-cxh:localonly`, it will open a Window that allows creation of a local User Account.

1. Press **SHIFT+F10** (or **SHIFT+FN+F10** if you have Fn-Lock)
2. Enter `start ms-cxh:localonly`
3. Specify Username, Password and and 3 seperate Recovery Questions

This can be done at any Point of the Setup, but it is recommended to do that right before being asked if the Device is for Personal or Work/School use
