

Manage Drivers with pnputil

Install inf-Drivers

1. Extract your Downloaded Driver
2. Open cmd.exe as Administrator and navigate (cd) into your extracted Directory
3. Enter `pnputil -i -a yourdriver.inf` and press Enter

List Drivers and Search

1. Open powershell.exe
2. Run `Get-WindowsDriver | Format-Table`

Search

You can filter by Column Values in this Table

Example: `Get-WindowsDriver -Online -All | Format-Table | Where-Object { $_.column -match "Value" }`
