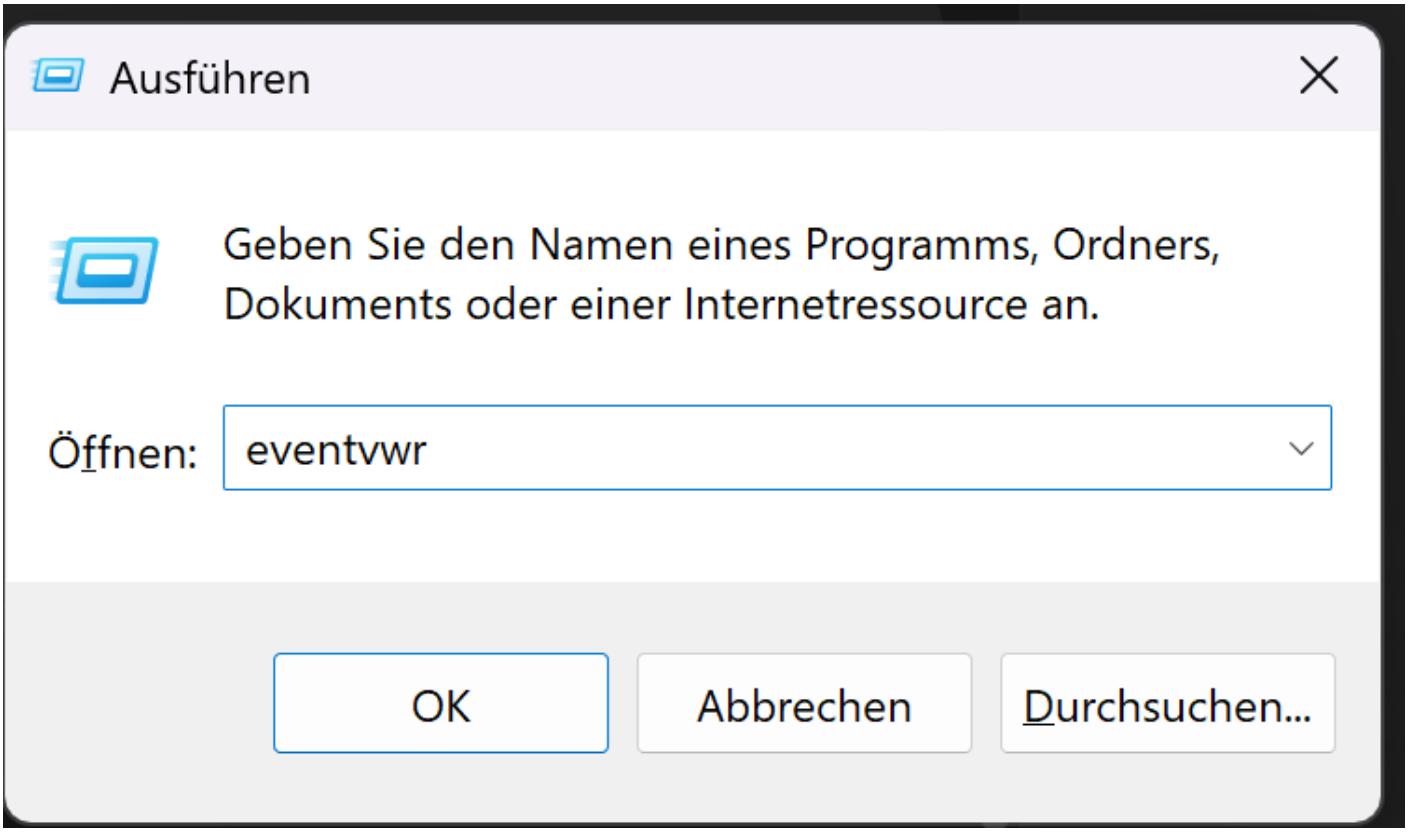
BSOD in Log Event Viewer

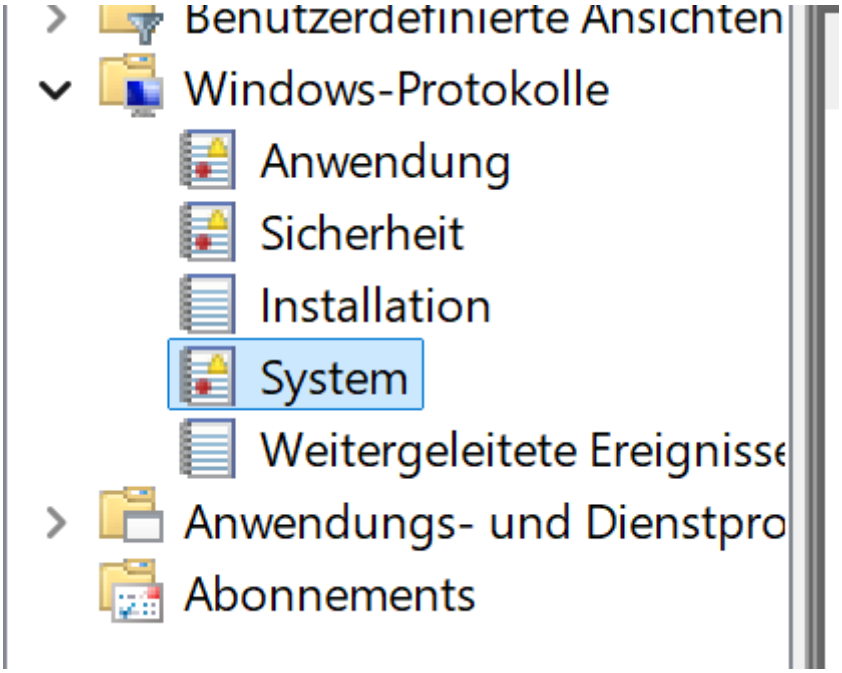
Windows Blue-Screen-of-Death' (BSOD), generally, produce System Log Events of Type *Kernel-Power* and Level *Critical*. Based on them, futher Diagnosis like Memory Dumps or Integrity Checks can be performed.

How to Filter System Event Logs

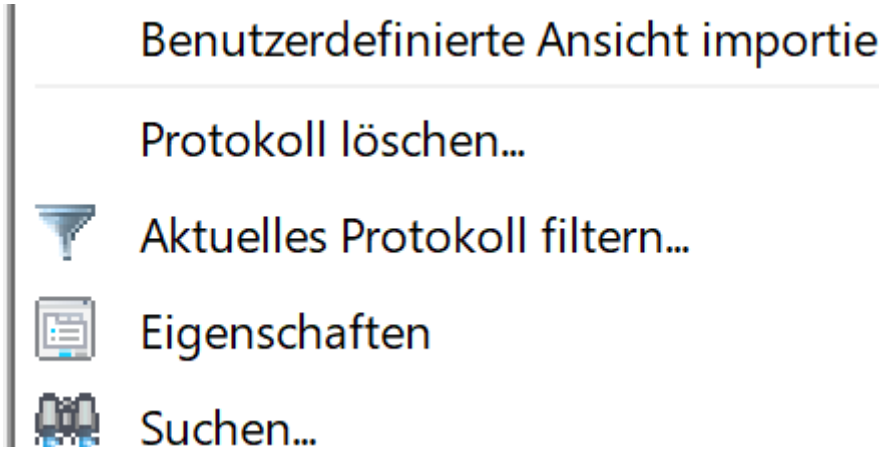
1. Press Windows-Key + R and enter `eventvwr`



Go to *Windows-Protocols* and select *System*



Click on *Filter current Protocol*



Select Event Level *Critical* and set a Timeframe
